SMUDGE SMEAR!!

https://youtu.be/AIcMgZR-Xk9

Lightly draw a line from the dot to each corner. Next, shade the triangles to **MATCH** the values in the image next to it.
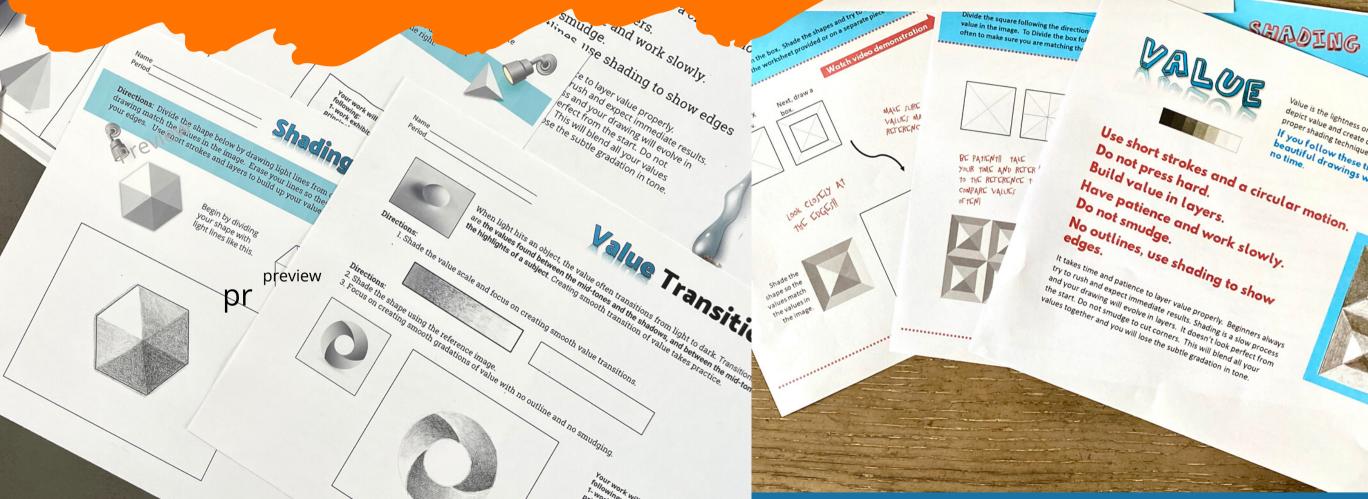

Your work will be evaluated on the following:
1- work exhibits little understanding of principal or idea
5- Work exhibits exemplary understanding of principal or idea.

Value is used to define all edges (no outline).
1   2   3   4   5
Values match the values in the image.
1   2   3   4   5
Shading follows the contour of the form.
1   2   3   4   5
Proper technique: small layered strokes of graphite. No smudging.
1   2   3   4   5
Neatness smooth shading and no sketchy lines.
1   2   3   4   5

Shading

Directions: Divide the shape below by drawing light lines from corner to corner. Erase your lines so they match the values in the image. Use short strokes and layers to build up your values.

Begin by dividing your shape with light lines like this.

preview

Value Transition

Directions:
1. Shade the value scale and focus on creating smooth value transitions.
2. Shade the shape using the reference image.
3. Focus on creating smooth value gradations of value with no outline and no smudging.

When light hits an object, the value often transitions from light to dark. Transitions are the values found between the mid-tones and the shadows, and between the mid-tones and the highlights of a subject. Creating smooth transition of value takes practice.

Your work will be evaluated on the following:
1- work exhibits
5- princip...

Divide the box. Shade the shapes and try to match the value in the box. Shade the shape so the values match the values in the image.

Divide the square following the directions and shade to match the value in the image. To Divide the box following refer to the image often to make sure you are matching the values.

Watch video demonstration

Next, draw a box.

MAKE SURE VALUES MATCH REFERENCE

BE PATIENT!! TAKE YOUR TIME AND REFER TO THE REFERENCE + COMPARE VALUES OFTEN!

LOOK CLOSELY AT THE EDGES!!

Shade the shape so the values match the values in the image.

VALUE

Use short strokes and a circular motion.
Do not press hard.
Build value in layers.
Have patience and work slowly.
Do not smudge.
No outlines, use shading to show edges.

It takes time and patience to layer value properly. Beginners always try to rush and expect immediate results. Shading is a slow process and your drawing will evolve in layers. It doesn't look perfect from the start. Do not smudge to cut corners. This will blend all your values together and you will lose the subtle gradation in tone.
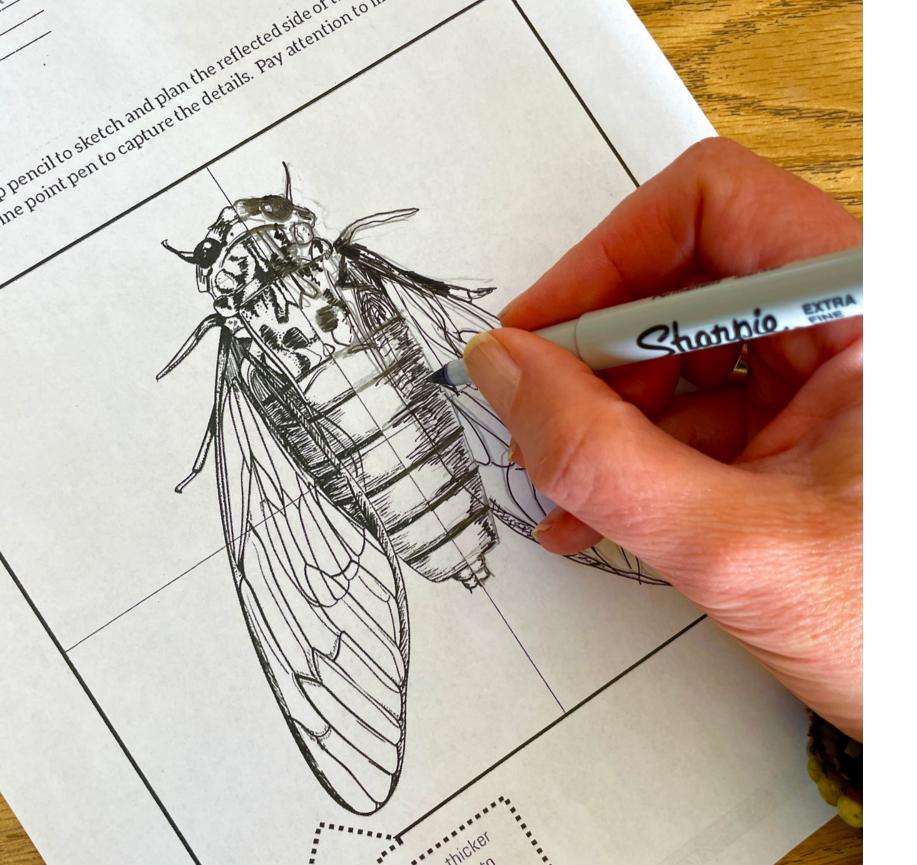

Value is the lightness or darkness of a color. Shading is used to depict value and create depth and dimension in art. Learning proper shading technique is an important skill that takes practice.
If you follow these tips you will be creating beautiful drawings with depth and dimension in no time.

SHADING

...s shape looks more like a form and has depth and dimension.

Directions:
2. Shade the sphere using the reference...
3. Focus on creating smooth gradation...

...smudge. ...lines, use shading to show edges

...re to layer value properly. ...rush and expect immediate results. ...s and your drawing will evolve in ...erfect from the start. Do not ...This will blend all your values ...ose the subtle gradation in tone.

**READY- TO- GO
Amazing Results!**
